## Revolutionary Cold Fusion Non Slip Technology Now Arrived to New Zealand to Help Preventing Slip Falls

Global Safe Technologies New Zealand & Pacific Islands is proud to announce that its non slip solutions product range now includes the SAFE GRIP anti slip strips and non skid coating solution.

Safe Grip is a very fast drying and curing, non slip product with very high slip resistance rating, outstanding adhesion and wear resistance. The Safe Grip is applied using a unique patent pending cold fusion technology.

Safe Grip has outstanding durability as well as it is heat, water, electric current, salt-water, UV, impact and chemical resistant and fire retardant.

The product has already been rolled out across Australia and now available in New Zealand.
