

Tailored Floor Safety Risk Management, not just Non Slip Floors!

Home Safe, Work Safe, GLOBAL SAFE©

Global Safe Technologies Safe Grip anti slip stair nosing solution helps large school to provide OH&S compliant non slip environment for students and staff

Global Safe Technologies NSW has recently completed a floor safety job at the art teaching room of a very large college in Gordon, Sydney. The existing stair nosings in the school now have been rejuvenated using the Safe Grip anti slip stair nosing. School management was concerned about the slipperiness of the surfaces. They have contacted various suppliers and after considering their options, they decided to go ahead with the Safe Grip stair nosing and strips across the school. Reasons for their decisions were;

- Proven sustainability of the Safe Grip anti slip surface which is guaranteed to 7 years and expected to last in excess of 10 years.
- Aesthetical appearance of the surface
- FSMP©, the industry unique risk management program offer **at No additional cost** to them
- Best value for money including a Global Safe Technologies Australia's 2.5 percent charitable donation to the value of the work.

After the job has completed, the maintenance manager stated that he was very satisfied with the result and said "The solution will ensure that our students and staff will now have a safe and good looking environment which but has also solved one of my concerns".

The Global Safe Technologies Floor Safety Network is proud having helped another large school with anti slip products and services.
