

Global Safe Technologies (Australia) Pty Ltd

Tailored Floor Safety Risk Management, not just Non Slip Floors!

Home Safe, Work Safe, GLOBAL SAFE©

Wellington Council basement given an Anti-Slip Face Lift!

Global Safe Technologies New Zealand & Pacific Islands has finished the rejuvenation of the basement area and stairs for the Wellington Council using the Floor Tuff Green environmentally friendly polyurethane anti slip coating.

The Council management was concerned about the slipperiness of the stairs and surfaces and also wanted to lift the appearance of the surface. They selected the Floor Tuff Green based on its proven sustainability, environmentally friendliness, fast curing time and great appearance. The Council was also interested in the industry unique, Floor Safety Maintenance Program (FSMP) which is now in effect, ensuring that the floor surface will remain

safe for all who use the surfaces, now and in the future. Global Safe offers the FSMP **at no additional cost.**

The Council management is very satisfied with the end result. It vastly improved the safety of the steps and other surfaces while also greatly improved the look of the area.
