

Global Safe Technologies (Australia) Pty Ltd

Tailored Floor Safety Risk Management, not just Non Slip Floors!

Home Safe, Work Safe, GLOBAL SAFE©

Mackay Engineering Firm's Ongoing Slippery Stairs Issue Resolved

QLD Antislip Solutions have solved the slip and fall risk for a large Mackay based engineering firm. The Safe Grip product was suggested and accepted based on its outstanding sustainability and slip resistive qualities as well as its excellent suitability for this specific environment.

After completion of the treatment the management were extremely happy with the end result, which has greatly improved employee's safety and minimised the risk of slip and fall accidents in the workplace.

The industry unique, Floor Safety Maintenance Program (FSMP) is also been accepted by the client which will ensure that the surface as well as other treated floor surfaces will remain safe for all employees and visitors, now and in the future. Global Safe offers the FSMP to non domestic clients **at no additional cost.**

For further information about Safe Grip please visit www.globalsafe.com.au/anti-slip-strips.php.

For further information on the Global Safe Technologies Australia's non slip solutions range of products call us on 1300 668 620 or visit our website www.globalsafe.com.au/index.php#solution

If you have any specific concern about your floor surface and would like to contact an Authorised Dealer in your area visit <http://www.globalsafe.com.au/contactus.php>.

Your local Authorised Dealer will contact and arrange an appointment with you, will visit your site to assess the floor safety risk of your specific situation and will provide you with a complimentary FREE Floor Safety Inspection Report.
