

## WARRANTY

Under the Building code of Australia, all suppliers to the building industry are required to provide a seven year guarantee of products.

Qualicoat members provide a minimum seven year guarantee and conform to international powdercoating best practice, have their powder products independently tested and the application processes randomly audited.

The powder manufacturer guarantees the coating performance of the Qualicoat approved powder. They do not guarantee the pre-treatment or application of the powder. The pre-treatment and application is guaranteed by the Qualicoat applicator.

Standard warranty powders are not guaranteed in some specific harsh environments such as direct coastal exposure. Higher durability powders are available for those conditions. Refer to the Qualicoat website ([www.qualicoat.org.au](http://www.qualicoat.org.au)) for classification of environmental conditions as outlined in AS3715, or ask the powder manufacturer.

Coatings need to be reasonably maintained to validate the warranty and maintain the finish. Guidance is available on the Qualicoat website ([www.qualicoat.org.au](http://www.qualicoat.org.au)), in AS31725 or in the powder manufacturer's terms and conditions.

**Disclaimer:** the role of the AISF is to administer the Qualicoat system and independent audits. All advice, recommendation, information, assistance or service provided is given in good faith and is believed by the parties to be appropriate, but is given without any liability or responsibility on behalf of Qualicoat, AISF, AWA or AAC.
