

ELECTRONIC BLUEPRINT is the principal point of reference and knowledge base for Architects, Engineers and Builders and the only package that fully integrates regulatory & standards requirements with comprehensive, editable specifications, CAD details and approved industry training.

## **Electronic Blueprint & ENVIROSPEC Partner with M&V (India) to assist Building Products Suppliers through CodeMark**

Electronic Blueprint, a web-based building specification and technical marketing service, has announced plans to work closely with M&V, of India, to assist building products suppliers to understand and negotiate the hurdles of Code-Mark and Building Code of Australia (BCA) compliance. Particular emphasis will be accorded to sustainability issues through the ENVIROSPEC division of Electronic Blueprint.

Rod Johnston (Electronic Blueprint Chairman) stated, "Building products importers should be aware of the Australian Building Codes Board (ABCB) CodeMark scheme for third party certification of building products for the Australian market. We will work closely with M&V to ensure that Indian suppliers meet sustainability and BCA requirements, and achieve CodeMark certification where applicable. CodeMark is an important tool in ensuring the availability of high quality building products in Australia. Our link with M&V (India) is an important step in ensuring that this quality can be achieved".
