

ELECTRONIC BLUEPRINT is the principal point of reference and knowledge base for Architects, Engineers and Builders and the only package that fully integrates regulatory & standards requirements with comprehensive, editable specifications, CAD details and approved industry training.

Electronic Blueprint & ENVIROSPEC Support Sustainable Products throughout Asia-Pacific

Speaking of the changes sweeping through the Asia-Pacific building industry, Rod Johnston (Electronic Blueprint Chairman) stated, "We are witnessing dramatic changes in the way we design and construct our buildings. Though our ENVIROSPEC Division, we stand ready to assist manufacturers and suppliers to understand and meet the high expectations for sustainability. Using tools such as CodeMark [third party certification to the Building Code of Australia] and ISO 14024 [ecolabelling] we can bring an honest and rational approach to the sustainability of building products".
