

ELECTRONIC BLUEPRINT is the principal point of reference and knowledge base for Architects, Engineers and Builders and the only package that fully integrates regulatory & standards requirements with comprehensive, editable specifications, CAD details and approved industry training.

## Electronic Blueprint & ENVIROSPEC Promote Sustainability in Indian Building Industry

“India represents a huge potential for sustainable building product suppliers”, says Karen Bloomfield (Electronic Blueprint CEO) of the moves by Electronic Blueprint (through its ENVIROSPEC division) to assist the Indian building industry to promote responsible products.

Speaking of the recent Ahmadabad (India) energy exhibition, Mrs. Bloomfield said, “We will work closely with our Indian and Australian partners to assess, certify and promote those building products that contribute positively to our built environment. ENVIROSPEC has developed and uses a protocol to deal with the sustainability issues unique to building products, in the context of building regulations, third party certification and ISO 14024 ecolabelling. “
